## Assignment 12

Ques 1

```
import java.util.Scanner;

public class ArithmeticException {
    public static void main(String[] args) {
        int a, b, c;
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter First Num: ");
        a = sc.nextInt();
        System.out.println("Enter Second Num: ");
        b = sc.nextInt();

        try {
            c = a/b;
```

-- PC

```
System.out.println("Result : " + c);
```

```
}
```

```
catch(ArithmeticException e)
```

```
{
```

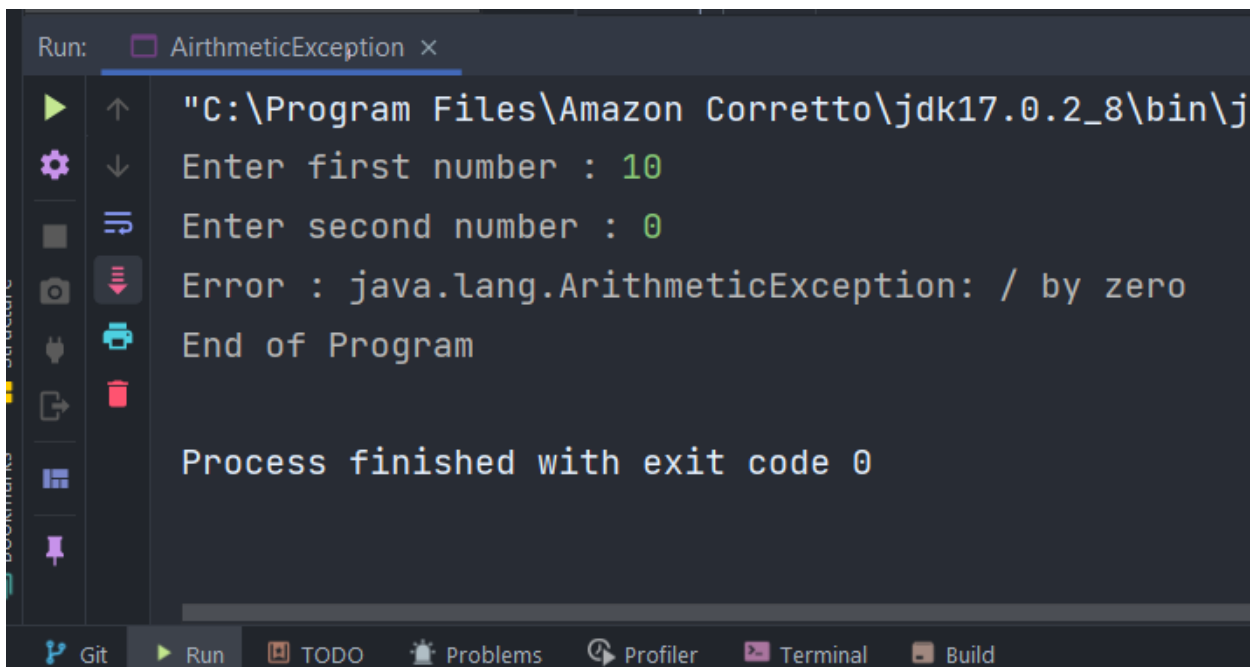

```
System.out.println("Error : " + e);
```

```
}
```

```
System.out.println("End");
```

```
}
```

```
}
```

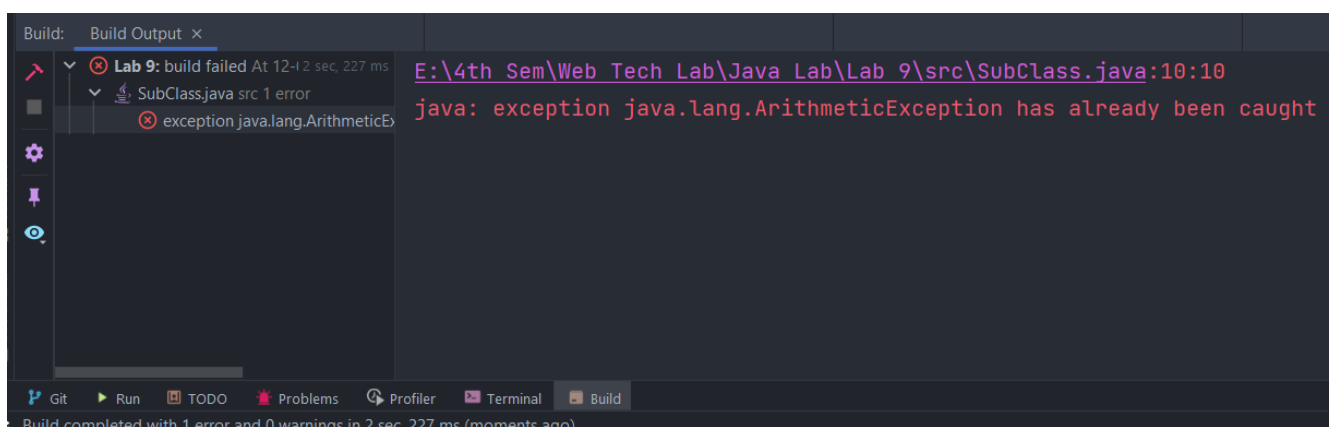

```
Run: AirthmeticException x
"C:\Program Files\Amazon Corretto\jdk17.0.2_8\bin\j
Enter first number : 10
Enter second number : 0
Error : java.lang.ArithmeticException: / by zero
End of Program

Process finished with exit code 0
```

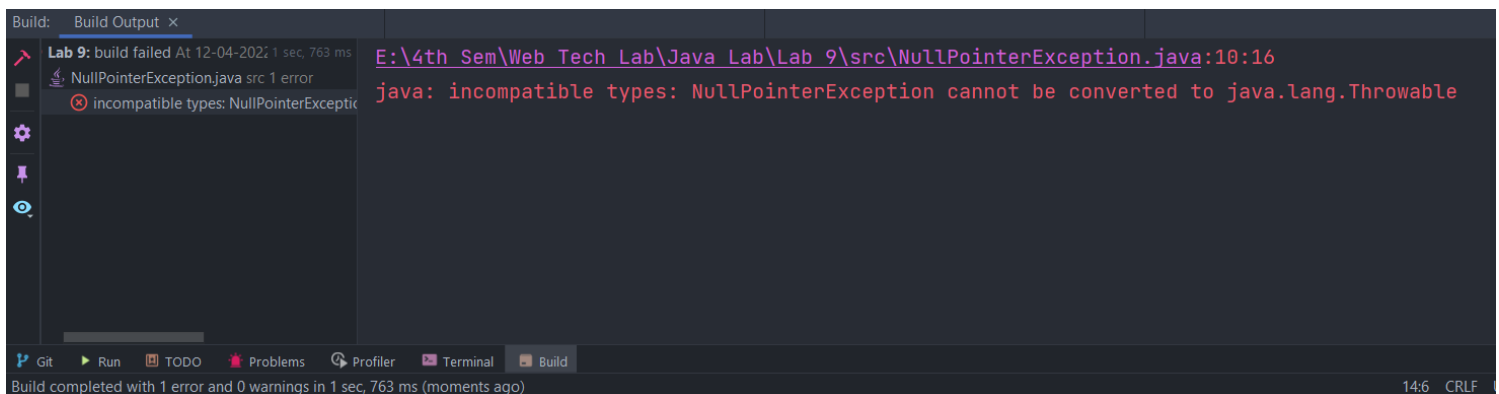

Ques 2

```
public class SubClass {  
    public static void main(String[] args) {  
        try {  
            int n = 10/0;  
        }  
  
        catch (Exception e) {  
            System.out.println(e);  
        }  
  
        catch (ArithmeticException e) {  
            System.out.println(e);  
        }  
    }  
}
```

Ques 3

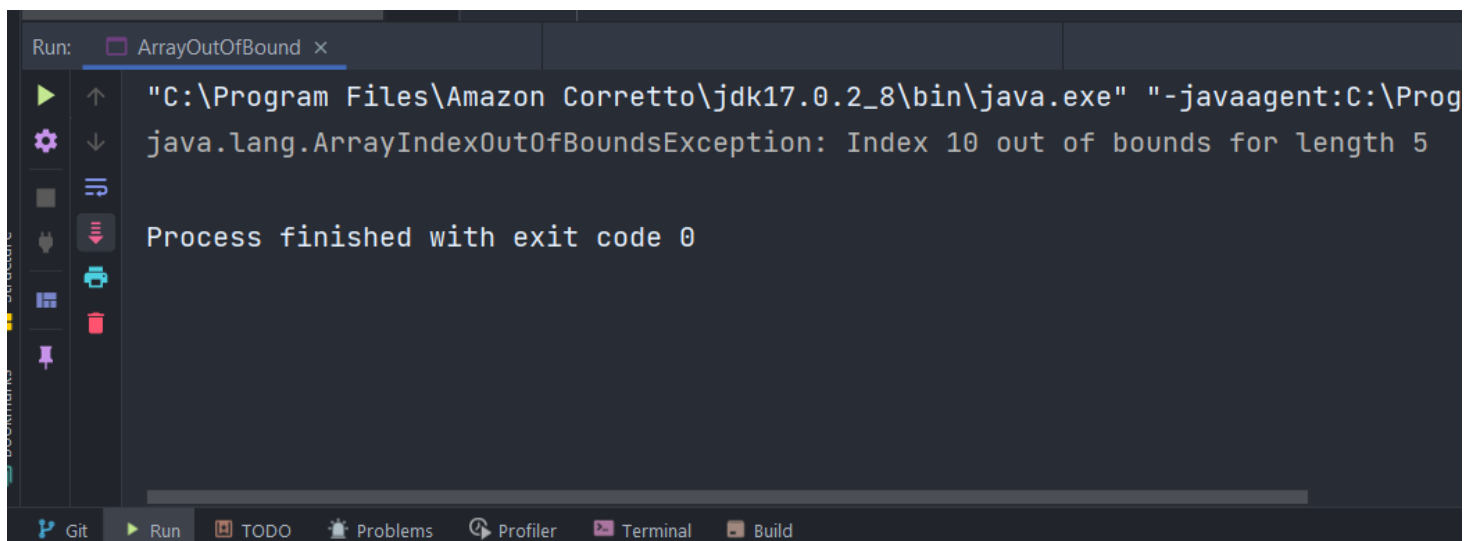

```
public class NullPointerException {  
    public static void main(String[] args) {  
        String str = null;  
        try {  
            int x = str.length();  
        }  
        catch (NullPointerException e) {  
            System.out.println(e);  
        }  
    }  
}
```

The screenshot shows an IDE's Build Output window. The title bar reads 'Build: Build Output x'. The main content area displays the following error message: 'Lab 9: build failed At 12-04-2022 1 sec, 763 ms' followed by 'NullPointerException.java src 1 error'. Below this, a red icon and text state 'incompatible types: NullPointerException'. The error details specify the file path 'E:\4th Sem\Web Tech Lab\Java Lab\Lab 9\src\NullPointerException.java:10:16' and the message 'java: incompatible types: NullPointerException cannot be converted to java.lang.Throwable'. The bottom status bar indicates 'Build completed with 1 error and 0 warnings in 1 sec, 763 ms (moments ago)' and shows the time '14:6' and 'CRLF'.

Ques 4

```
public class ArrayOutOfBound {  
    public static void main(String[] args) {  
        int [] a = new int[5];  
  
        try {  
            int x = a[10];  
        }  
        catch (ArrayIndexOutOfBoundsException e) {  
            System.out.println(e);  
        }  
    }  
}
```

```
Run: ArrayOutOfBound x  
"C:\Program Files\Amazon Corretto\jdk17.0.2_8\bin\java.exe" "-javaagent:C:\Progr  
java.lang.ArrayIndexOutOfBoundsException: Index 10 out of bounds for length 5  
  
Process finished with exit code 0
```

Ques 5

```
class NegativeNumberException extends Exception {  
    public NegativeNumberException() {  
        super();
```

```
    }
```

```
    public String toString() {  
        return "Negative Number Found";
```

```
    }
```

```
}
```

```
public class NegativeNumberDemo {
```

```
    public static void processInput (int x)
```

```
        throws NegativeNumberException {
```

```
        if (x < 0) {
```

```
            throw new NegativeNumberException();
```

```
        }
```

```
    }
```

```
    public static void main (String[] args) {
```

```
        Scanner sc = new Scanner(System.in);
```

```
int n = sc.nextInt();
```

```
try {
```

```
    processInput(x);
```

```
}
```

```
catch (NegativeNumberException e) {
```

```
    System.out.println(e);
```

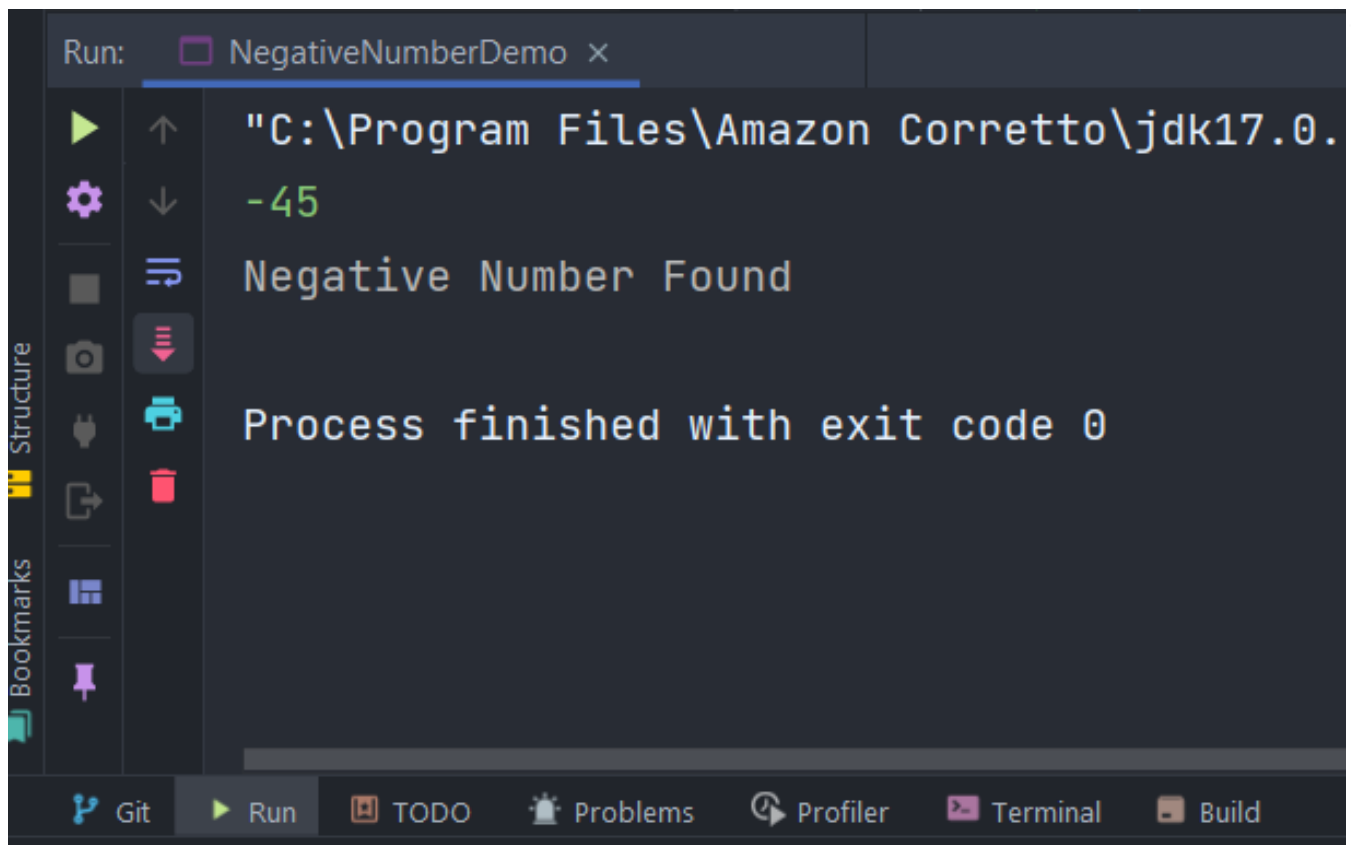

```
}
```

```
sc.close();
```

```
}
```

```
}
```

(try-catch block is used to handle exceptions)

```
Run: NegativeNumberDemo x
"C:\Program Files\Amazon Corretto\jdk17.0.
-45
Negative Number Found
Process finished with exit code 0
```

Ques 6

```
import java.util.*;  
  
class Hours_Exception extends Exception  
{  
    Hours_Exception(String s)  
    {  
        super(s);  
    }  
}
```

```
class Minutes_Exception(String s)  
{  
    Minutes_Exception(String s)  
    {  
        super(s);  
    }  
}
```

```
class Seconds_Exception extends Exception  
{  
    Seconds_Exception(String s)  
    {  
        super(s);  
    }  
}
```

```
